

All Saints Church, Alrewas

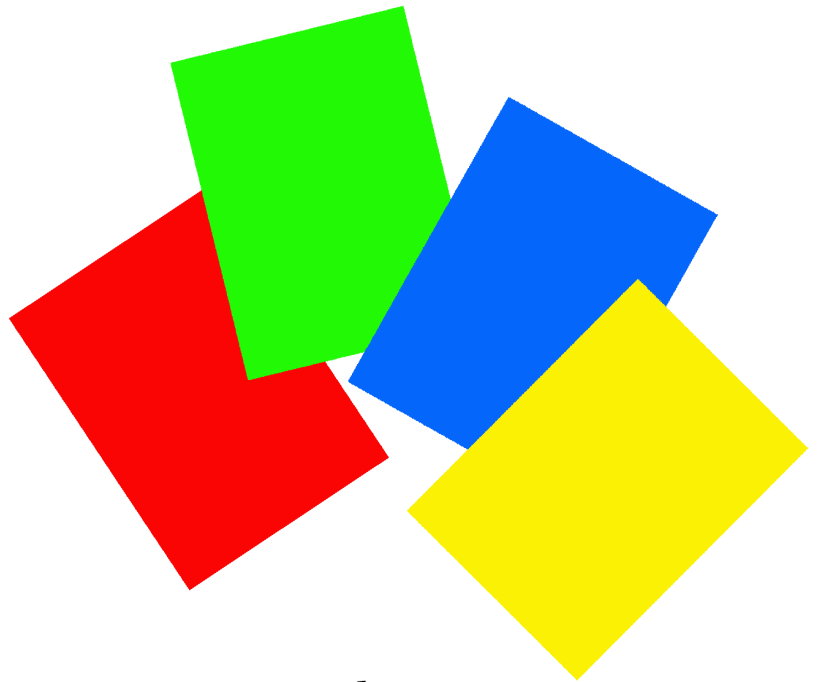

Make Your Own Stained Glass Windows

You will need these materials

Black Sugar Paper

Coloured Tissue Paper

Scissors

PVA Glue

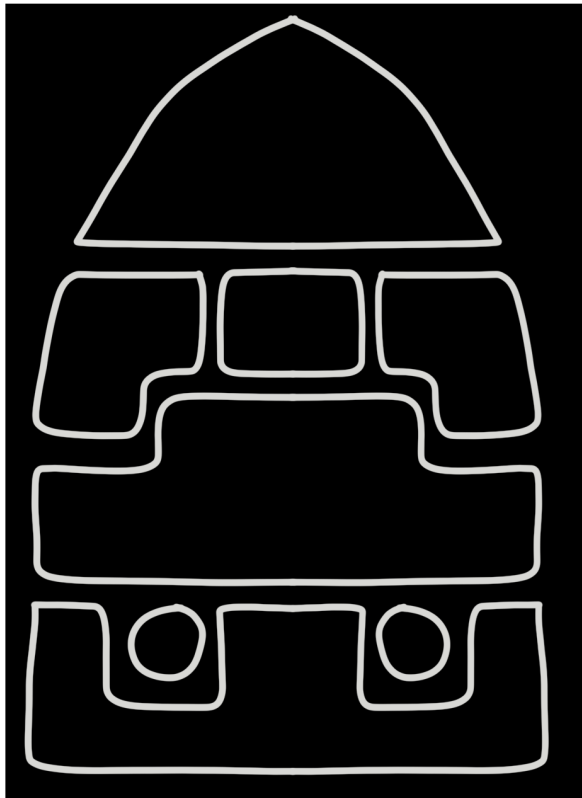

You will need to cover your table or desk with newspaper. Create a simple design for your window, if it's too complex it will be difficult to make.

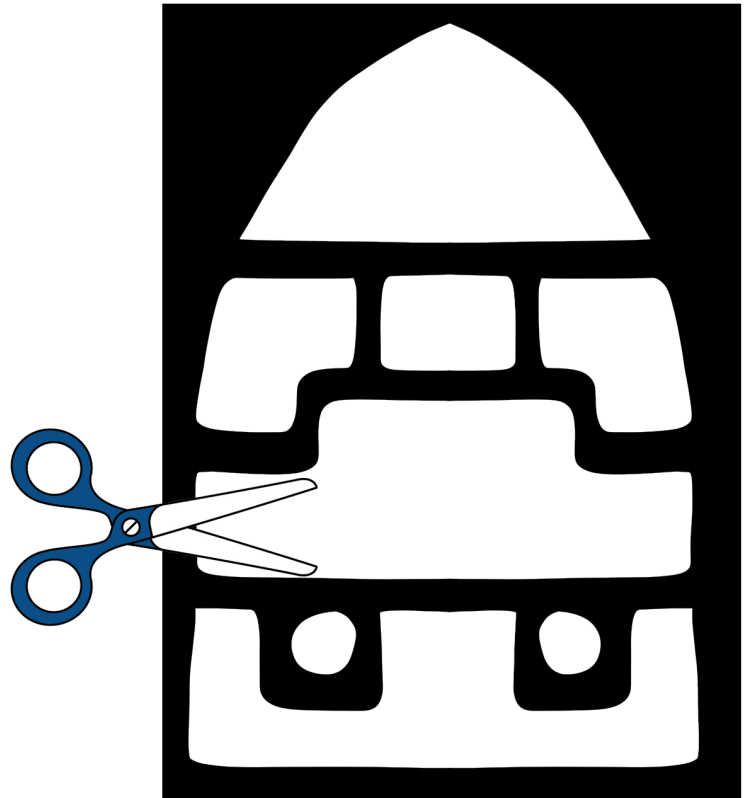

Simple shapes work well.

Follow the instructions on the next page.

Draw your design, in pencil, on the back of your black paper

Cut the shapes out using your scissors

Cut tissue paper to cover each shape with an overlap for glue. When all the shapes are made, carefully glue them in place taking care not to get glue on the tissue paper

When the glue is dry, turn your design over and stick it to a window to see the beautiful colours lit by the sun!
